

The list of distribution 'IBERIAN-PIG'

The list of distribution 'IBERIAN-PIG'
Spain

The list of distribution 'CERDO-IBERICO' is a forum promoted by the Animal Production Department (in the High Technical School of Agriculture and Forestry Engineering) of the University of Córdoba.

Presentation

It is intended to foster discussion on all those aspects related to the Iberian pig and its derived products (ham, loin, sausages):

- Production systems
- Carcass quality
- Genetics
- Quality of the derived products
- Quality evaluation
- Marketing of the products

Contributions from researchers, public or private companies, producers and people interested in the Iberian pig are welcomed to the list. It is intended to create a meeting place for researchers and members of the sector, where the latest scientific contributions are discussed. It also fosters the exchange of experiences, information, and results between all the members.

The discussions held in the list are mainly of a scientific character, but any other aspects, such as any news about the sector, or inquiries about the productive or industrial systems, are also included.
